

Dear Lyle D.Jaffe,

After hearing about the forced molting of layer hens I had to respond. As a animal lover and activist I must voice my opinion for the innocent animal's sake. Forced molting is not nessacary ad it is a disgusting and vulgar act. You should think of the poor suffering animals an what they have to go through, all for your pleasure! It's sick and distasteful. I definantly support the petition to ban the forced molting of layer hens. I hope because of the many that are speaking out that you will change your mind and your ways. Always go with your heart, and think of the animals.
